SUMMARY

Highly motivated Computer Science & Engineering student specializing in Artificial Intelligence and Machine Learning, seeking a challenging role to apply technical skills and problem-solving abilities. Proficient in Frontend Development. Demonstrated ability to quickly learn new technologies and collaborate effectively in team settings. Eager to contribute to innovative projects and drive positive outcomes.

TECHNICAL SKILLS: HTML, CSS, JavaScript, React.js, PHP, MySQL, Firebase, Supabase, Latex.

ACHIEVEMENTS & CERTIFICATIONS

- **Latex Certification**
- **Participated in 2+ Hackathons**
- **Successfully completed various Personal Projects consisting of clones using different Web Technologies.**

PROFESSIONAL EXPERIENCE

- **Internal Hackathon Organizer**

PROJECTS

VConnect

- React.js, Node.js, Express.js, Firebase
- VConnect is a gamified web platform that connects volunteers with organizers by offering event management tools, a points-based reward system (AURA), and social features to make volunteering engaging and rewarding.

EcoPlace

- React.js, JavaScript, Node.js, Express.js, Firebase
- EcoPlace is a platform that provides real-time sustainability scores for e-commerce products, empowering consumers and businesses to make eco-friendly decisions.

Image Caption Generator

- Machine Learning (BLIP Model), React.js, Flask
- The Image Caption Generator is a web application that allows users to upload an image and receive an AI-generated caption describing the content of the image. The project utilizes a Flask-based backend for image processing and a React.js frontend for an interactive user interface.
