PROJECTS

Refilla

Refillia is a web application that helps users locate free water refill stations, reducing plastic waste and promoting sustainability. Users can discover, add, and review refill stations, making clean drinking water more accessible while encouraging businesses to participate in eco-friendly initiatives. ([Try it here](#))

VConnect

VConnect is a gamified web platform that connects volunteers with organizers by offering event management tools, a points-based reward system (AURA), and social features to make volunteering engaging and rewarding. ([Try it here](#))

EcoPlace

EcoPlace is a platform that provides real-time sustainability scores for e-commerce products, empowering consumers and businesses to make eco-friendly decisions.

Image Caption Generator

The Image Caption Generator is a web application that allows users to upload an image and receive an AI-generated caption describing the content of the image. The project utilizes a Flask-based backend for image processing and a React.js frontend for an interactive user interface.
